

Minutes of Monthly Meeting M.D. Battle River No. 423 R. D. Smallwood Elected Reeve

The first meeting of the council of the municipal district of Battle River No. 423 for 1941 was called to order by the secretary-treasurer of the said municipal district at his office on Thursday, March 19th, 1941, in accordance with Section 41 ss. 1 of the Municipal Districts Act being Chapter 31 of the Statutes of Alberta with amendments.

At 10 a.m. the secretary declared the meeting open and advised that councillors Smallwood and Archibald had been elected as per the returning officers statement of file that they had signed the oath of office being Form A.

Councillors present — Archibald, Blakely, Collette, Killy, Smallwood and Steele.

Nomination open for the office of reeve for 1941.

Mr. Killy nominated Mr. Smallwood, no more nominations, same were closed on motion of Mr. Collette.

Mr. R. D. Smallwood declared elected reeve of the municipal district of Battle River for 1941 by acclamation.

Moved by Mr. Collette that H. Killy be deputy reeve for the first six months of 1941. Cd.

Moved by Mr. Blakely that the minutes of the meeting of February 18th as read be accepted. Cd.

Moved by Mr. Collette that the council meet on the second Thursday in each month at Irma Alberta at 10 a.m. Cd.

Moved by Mr. Collette that the reeve and secretary be the finance committee. Cd.

Moved by Mr. Smallwood that Mr. Collette be added to the finance committee. Cd.

Moved by Mr. Killy that councillors Blakely, Steele, and Archibald be the cemetery committee. Cd.

Moved by Mr. Blakely that each councillor be a committee, no more damage for his division and be empowered to call in any councillor. Cd.

Moved by Mr. Blakely that the council as a whole be the health committee. Cd.

Moved by Mr. Blakely that R. English be appointed auditor for the municipal district and be paid \$110.00 for services and the department of municipal affairs be advised. Cd.

Moved by Mr. Collette that Messrs. Purvis and Logan be retained as the municipal solicitors for 1941 and be paid \$50 as a retaining fee. Cd.

Moved by Mr. Collette that Dr. Greenberg and Wallace be appointed M.H.O.s for 1941. Cd.

Moved by Mr. Killy that the report

of the reeve and secretary be received. Cd.

Moved by Mr. Collette that the reeve and secretary be retained as the committee regarding the N.W. 22-45-7 and report at April meeting. Cd.

Moved by Mr. Killy that the reeve and secretary be retained as the committee re NE 30-45-9 McDowell, and for them to interview the municipal solicitor on March 14th and clear this matter and report at April meeting. Cd.

Moved by Mr. Blakely that in regards to the W's 10-45-7 H. E. May be that a committee be appointed to gather all information and power to lease said land, and to call a special meeting if necessary and that the committee be Messrs. Smallwood, Killy and Collette. Cd.

Moved by Mr. Steele that the report of Mr. Collette re W. Santee account to the Wainwright municipal hospital be accepted. Cd.

Moved by Mr. Blakely that the reeve and secretary be empowered on investigation to approve of all relief accounts for the month of March and forward same to the bureau of public welfare immediately after March 31st, so that the municipal district may be reimbursed March proportion of relief on account of the federal government discontinuing relief aid after March 31, 1941. Cd.

Moved by Mr. Blakely that relief be issued to Geo. McLean for \$12.00 until March 31st, 1941, and that a further issue of \$8 be extended if found necessary from April 1st to April 10th, 1941. Cd.

Moved by Mr. Smallwood that relief be issued to C. Abernathy for \$7.50 until March 31st and the secretary advise this party to find himself a job as no more relief will be issued after that date. Cd.

Moved by Mr. Collette that the secretary notify L. C. T. that this party is well and that the house rent, as occupied by C. Abernathy after May 1st, 1941, and that Mr. Abernathy also be notified. Cd.

Moved by Mr. Smallwood that relief be issued to Mrs. J. Bergquist for \$7 until March 31st, 1941, and an additional \$3 be issued from April 1st to April 10th if found necessary. Cd.

Moved by Mr. Killy that relief be issued to F. Cartier for \$8 until March 31st, and \$4 from April 1st to April 10 if found necessary. Cd.

Moved by Mr. Archibald that relief be extended to J. D. Nachstgal for \$7 until March 31 and \$8 from April 1st to April 10 if found necessary. Cd.

necessary and charge same to the provincial government. Cd.

Moved by Mr. Blakely that relief be extended to Mrs. A. Kniely for \$4 until March 31st and \$3 from April 1 to April 10 if found necessary and charge same to the provincial government. Cd.

Moved by Mr. Killy that in the matter of W. Adams and F. Cartier November relief account, that said account be placed with the bills for authorized payment, but Mr. Adams be advised that the municipal district will not be responsible for any relief account if relief is not authorized by the council. Cd.

Moved by Mr. Steele that the correspondence to and from Canada Life Assurance Co. re W's 10-45-7 be accepted and filed for reference. Cd.

Moved by Mr. Blakely that this council lease to A. Steele the NE 24-45-9 for one year as from this date for one third share of crop clear under the same terms as contained in lease signed March 18th, 1940. Cd.

Moved by Mr. Killy that the secretary place in the Irma Times a list of all lands subject to lease under the Tax Recovery Act that these lands will be offered for lease at the council meeting, April 10, 1941, at 2 o'clock in the afternoon. Cd.

Moved by Mr. Archibald that the secretary insert in the Irma Times that all lands that the municipal district can take title to under the Tax Recovery Act will be done at April 10 meeting of the council. Cd.

Moved by Mr. Blakely that the secretary write Mrs. A. A. Armstrong re leasing the SW 20-44-8 W4. Cd.

Moved by Mr. Blakely that the council lease to J. Saville the SW 17-44-9 for one year as from this date under the same terms and conditions as 1940 lease, and that Mr. Saville sign the lease agreement by April 10. Cd.

Moved by Mr. Collette that the reeve, Mr. Killy and the secretary be a committee to value lands for sale under the Tax Recovery Act and the councillor of each division be called in where such lands are situated. Cd.

Moved by Mr. Blakely that with regards to motion No. 66 of February 13, 1941, that the assessor be allowed to travel in the course of any assessment to be made under the assessment Act of 1938. Cd.

Moved by Mr. Collette that the secretary advise Mr. Jerome Balenais re his note that the council have accepted his offer of payment of \$25 on or before the 1st of May. Cd.

Moved by Mr. Collette that the matter of old accounts re the Royal Alexandra hospital as tabled from February 13, 1941, be now filed for reference. Cd.

Moved by Mr. Smallwood that in regards to the P.F.A. Act re townships 44 in ranges 8 and 9 that the secretary collect all data required crop yield, etc., and that Mr. F. C. Saville and Mr. F. C. Weise be asked to sit in with the secretary to help complete the information asked for by the P.F.A. branch. Cd.

Moved by Mr. Collette that the correspondence from J. E. Brownlee legal advice regarding road repairs be accepted and filed for reference. Cd.

Moved by Mr. Archibald that the circular letter from the department of agriculture re weed conference at Edmonton April 2 and 3 be received and filed. Cd.

Moved by Mr. Killy that the secretary advise the department of public works regarding Russian thieves on highway 14 from the Battle River east to Wainwright that same are blowing on adjacent farms and ask same to be looked after. Cd.

Moved by Mr. Blakely that the secretary write Mr. C. Nicidenius and Mr. G. Curtis that if they so wish they meet the council at April 10 meeting regarding building of roads. Cd.

Moved by Mr. Blakely that the secretary write the St. Anne's hospital at Hardisty re notice of admission of Mrs. Lee Reber, that as no location is shown on the notice the council is unable to say if this party is a resident or not and would ask them to try the Humboldt municipal district. Cd.

Moved by Mr. Collette that a committee of the reeve and secretary be appointed to interview the provincial government with regards to a government grant for municipal roads and other matters of municipal business. Cd.

Moved by Mr. Collette that the secretary be instructed to have a ban

placed on all municipal roads for truck and trailer traffic, when said dirt roads become wet. Cd.

Moved by Mr. Killy that the application of Mrs. P. M. King for tax consolidation on the S's 24-45-8, S's 20-45-7, S's 10-45-7, N's 10-45-7, N's 10-45-8 be approved. Cd.

Moved by Mr. Steele that the application of F. Youmker for tax consolidation E's 22-45-8 be approved. Cd.

Bylaw No. 68, a bylaw of the municipal district of Battle River No. 423 for the purpose of authorizing a grant to Dr. Greenberg a duly licensed medical practitioner of the province of Alberta and payment thereof, presented.

Moved by Mr. Collette that bylaw No. 68 pass its first reading. Cd.

Moved by Mr. Blakely that bylaw No. 68 pass its second reading. Cd.

Moved by Mr. Steele that bylaw No. 68 pass its third and final reading. Cd.

Bylaw No. 69, a bylaw of the municipal district of Battle River No. 423 setting the mill rate for rural school purposes for 1941 at 14 mills on the dollars, presented.

Moved by Mr. Blakely that bylaw No. 69 pass its first reading. Cd.

Moved by Mr. Archibald that bylaw No. 69 pass its second reading. Cd.

Moved by Mr. Collette that bylaw No. 69 pass its third reading. Cd.

Moved by Mr. Killy that the mill rate for 1941 hospital purposes be set at 3 and 3-tenths mills on the dollar. Cd.

Moved by Mr. Blakely that the finance committee be empowered to obtain from the Bank of Montreal a \$12,000.00 line of credit for hospital purposes. Cd.

Moved by Mr. Collette that the finance committee be empowered to obtain from the Bank of Montreal a \$1,200.00 line of credit for hospital purposes. Cd.

Moved by Mr. Killy that the reeve and treasurer be and are hereby authorized to borrow from the Bank of Montreal the sum of \$125.00 to meet the first quarter hospital requisition. Cd.

Moved by Mr. Blakely that the

receipt of the last shipment of Red Cross supplies from Irma was acknowledged last week by the war work committee at Edmonton. This shipment consisted of 41 pairs mitts and gloves, 8 pairs socks, 4 scarves, 2 pairs bed socks, 15 quilts, 1 scarf, 1 crib comforter. The committee advised that no more supplies are required.

In a cable received by Dr. Rostley of Toronto from the Canadian Red Cross headquarters in London, England, they advise that large quantities of supplies are urgently needed. Since January 1, the supplies given out equal the total distribution for the year 1940. Constant air raids and bombing attacks create a tremendous demand for Red Cross supplies of all kinds.

SENIOR C.G.I.T.

On Tuesday, March 18, a meeting of the C.G.I.T. was called. Performances of the concert to be held were practiced and approved. Some very good comedies were performed.

The senior group then held a short meeting. The group voted to have a taffy party on Wednesday, March 26. Committees were appointed to gather the lunch and a few ideas for an impromptu initiation of some mem. The meeting adjourned.

Farewell Party For Irma Family

On Tuesday evening March 26, a farewell party was held in the United Church for Mr. and Mrs. Osterhout who are leaving for the Pacific coast where, after a short visit with relatives and friends, they will make their new home.

During their residence in the Irma community Mrs. Osterhout has been actively identified with the church and especially so as a teacher in the Sunday school and for many years president of the Women's Missionary Society. Special tributes of appreciation and good wishes were voiced by Mr. I. S. Steele on behalf of the Sunday school, Mrs. Arnold on behalf of the Ladies' Aid and Mrs. Locks for the W.M.S.

Mr. Longmire spoke on behalf of the congregation and also reminded the guests of honor that church fellowship is much larger than any local or community group or organization and no matter where they might make their new home they would find an opportunity for the worship service and fellowship of the church.

The presentation address was given by Mrs. Shaw and the presentation made by Mrs. A. Peterson. Other numbers on the evening's program, greatly enjoyed by all, were vocal solo by Miss Stewart and a reading by Mrs. Cooper. The party closed with a beautiful lunch served by the ladies of the church.

Mr. and Mrs. Osterhout expect to leave Irma by car next Saturday morning on their journey to the coast.

Red Cross Notes

The receipt of the last shipment of Red Cross supplies from Irma was acknowledged last week by the war work committee at Edmonton. This shipment consisted of 41 pairs mitts and gloves, 8 pairs socks, 4 scarves, 2 pairs bed socks, 15 quilts, 1 scarf, 1 crib comforter. The committee advised that no more supplies are required.

In a cable received by Dr. Rostley of Toronto from the Canadian Red Cross headquarters in London, England, they advise that large quantities of supplies are urgently needed. Since January 1, the supplies given out equal the total distribution for the year 1940. Constant air raids and bombing attacks create a tremendous demand for Red Cross supplies of all kinds.

Mid-week service on Wednesday evenings at 7:30 o'clock. Everyone cordially invited.

FULL GOSPEL CHURCH Sunday Services: Ross—Sunday school and church at 1:30 p.m.

Irma—7:45 p.m. (R. Fuder res.)

W.I. MEETING

Owing to the Wednesday demonstration being held on the meeting day, there will be a short meeting starting at 2 p.m. in Hodel's hall on Thurs. April 3. Raffle and paper will be omitted. Roll call to be answered with My Favorite Pastime.

Hostesses are Mrs. McMillan, Mrs. Fischer and M's Hager.

IN MEMORIAM

In memory of Elizabeth Ann Pile who passed away March 25, 1940. Loving wife and mother, so gentle and kind.

What a wonderful memory she left behind. Long days, long nights she bore her pain.

To wait for cure, but all in vain, Till God Himself knew what was best. And took her home and gave her rest.

Sadly missed by Husband, Sons, Daughters, Grandchildren and Friends.

FOR RENT—Three room cottage, partly furnished, and garage, from April 1st to Nov. 1st. Mrs. H. McKay, Phone 417, Irma Alta. 28-4p

FOR SALE—One Massey Harris, 7 ft. disk with truck, one 4 h.p. Cushman engine, one De Laval number 12 cream separator. J. G. Hae, Irma. 21-23-41p

Canada's First People

Scientists Looking For Spearhead Embedded In Ancient Bone

An ancient spearhead embedded in an equally ancient bone is the discovery wanted by scientists to help fill in about 10,000 vacant years.

Dr. D. Jennings, chief of the anthropological division of the National Museum, said Canadian discoveries of the Folsom point over a period of years have encouraged the hope that further information about the Dominion's first people may be assembled.

The Folsom point, evidently the point of a spear and made by chipping chert stone, is the only relic of the oldest race of Americans. Their antiquity was established approximately when geologists examined formations in which they were found in the United States, chiefly in Colorado, New Mexico, Nevada, and Utah. Geologists said these formations were from 10,000 to 20,000 years old, and it has been assumed that Folsom points found on the surface in Canada must be about the same age.

Most Folsom Point discoveries have been made on the prairies, and it may be that some were carried there by the first men who crossed from Asia to Alaska. It is known that the ice receded first from the eastern slopes of the Rockies and scientists have noted that Folsom points have been found only in the area east of the mountains, indicating that the wanderers followed game from the north as ice desolation was succeeded by soil.

"Surface discoveries of Folsom points are not particularly helpful," said Dr. Jennings. "Unless they are in the earth formations in which they have lain for so long they cannot tell us more than we already know."

"If one were found embedded in a bone we could establish the age more exactly by studying the bone and applying our knowledge of the period in which these animals lived."

The Folsom era men in Canada had an extraordinary range of animals they might hunt—or flee—including a three-toed horse, a type of camel, a species of bison, a giant sloth, and the mammoth.

Worked With Edison

Last Of Famous Inventor's Laboratory Assistants Dies In Florida

Francis Jehl, the last of the seven laboratory assistants who worked with Thomas A. Edison, at Menlo Park, N.J., to give the world the incandescent lamp, and who died on Feb. 9 in St. Petersburg, Florida, at the age of eighty, began work with the great inventor as a boy in 1878. He worked with Mr. Edison until one day in February, 1882, when the latter said to him: "Francis, I want you to go to Europe for me to introduce the new lamp and meter over there. I have planned for you to leave next week." Mr. Jehl sailed for Europe in 1882 and did not come back for 40 years. He settled in Prague but his travels took him everywhere as an expert who helped replace the guttering candles and flickering gas lights in the Old World with the new wonder of electricity. Mr. Jehl lost most of his money in the debacle of the World War and Mr. Edison sent him funds to return to the United States. He arrived back in 1922. When Henry Ford set up the replica of Menlo Park in Greenfield Village at Dearborn, Mich., Mr. Jehl was engaged to superintend the reconstruction and he remained as curator of the Edison Museum.

World's Longest Fence

Ambitious Plan Being Discussed By Texas Cattle Raisers

The longest fence in the world will be one built on the north bank of the Rio Grande if plans of the border fence committee of the Texas & Southwestern Cattle Raisers' Association mature.

The fence, as proposed, would be approximately 500 miles long, extending from the Gulf of Mexico to the mouth of Devil's river about 12 miles north of Del Rio, Texas. Beyond Del Rio the deep river canyon and natural barriers are said to make the fence unnecessary.

The proposed fence would prevent predatory animals, livestock and wild game crossing between Mexico and the United States.

Process Will Be Shared

Laboratory experiments conducted by the Council for Scientific and Industrial Research in Australia have shown that the Freney process for the production of unshrinkable wool might possess advantages over other processes. Prime Minister Menzies said if the results of the semi-large scale tests were successful, the Council did not propose to restrict the use of the process to Australia.

Poultry Colony House

Poultrymen And Farmers Will Find It Has Many Uses

One of the most useful houses a poultry keeper can possess is a colony type house, says K. MacBean, Dominion Experimental Sub-station, Smithers, British Columbia. This applies not only to the farmer keeping a small flock but also to the poultryman in the business on a larger scale.

A very valuable feature about a colony house is the fact that it can be used for many purposes. It may be made available as a brooder house, a rearing pen, laying house or breeding pen.

At the Sub-station at Smithers, B.C., a 10 x 12 colony house was built in the fall of 1939 and put to use the following spring. The results with this house so far have been gratifying. In the first place this house was used as a brooder house with the necessary equipment such as brooder stove, etc., installed for the purpose. At the end of the brooding period or when the chicks were old enough to do without heat the stove was removed. In due time the cockerels were separated from the pullets and moved to another house. The pullets were allowed to remain in this colony house now being used as a rearing pen. All pullets were left in this house until more room was required as they grew and then a sufficient number was taken out to assure that those left in were not overcrowded. By the use of properly adjusted temporary roosts the pullets left in the colony house were reared satisfactorily until they developed to laying age.

The colony house was converted from a rearing pen to laying pen by the addition of nests, dropping boards, roosts, etc., which were all made movable to facilitate cleaning. A house of the size mentioned can accommodate from 25 to 30 laying birds.

Besides the use of a colony house as a laying house it can readily be made available for a two-pen breeding house by putting in a temporary partition.

In addition to the various uses just mentioned a colony house can also be used as a fattening pen or for quarantining purchased stock before introducing it to the flock.

The addition of one or more colony houses to any poultry plant is a convenience that once experienced will be much appreciated. The colony house should be lightly but strongly built so as to make it readily portable by team or tractor. The fact that a colony house should be built on skids and so made portable is essentially important so that it can be moved on to fresh ground as frequently as occasion demands. It is advisable to have the colony house insulated if it is to be used as a laying house under winter conditions. An abundance of light and good ventilation without draughts should be provided.

An illustrated circular giving specifications for a movable colony house may be obtained free on application to the Publicity and Extension Division, Dominion Department of Agriculture.

A mechanical stenographer has been devised in the United States. Its chief handicap is that it transcribes exactly what the boss dictates.

With Herbert Morrison, Britain's minister of home security, Mrs. Winston Churchill is shown inspecting the latest type of air-raid shelter for British homes. It is a steel table which can be used for meals during the day. At night it is converted into a steel chamber in which the night can be spent with comparative safety.

May Be Helpful

Some Suggestions On Best Way To Keep Flowers Fresh

To make a choice bouquet last as long as possible, cut slantwise the stems of each flower and stand the bunch for several hours in a large container, in water up to their necks. Trim off all leaves and parts not needed; the shorter your stems, the longer the life of your bouquet.

Flowers with watery stems, such as dahlias, hollyhocks, poppies and mimosa, will keep longer if the stems are immediately sealed against bleeding by dipping the ends into boiling water or singeing them over a flame. This treatment will sometimes revive flowers which are beginning to wilt. Other flowers will revive better if put into a large jar of cold water.

No known chemical will preserve flowers, though some believe aspirin or salt beneficial. A disinfectant, such as charcoal or potassium nitrate, which discourages the development of bacteria in the water, may help. The water should be changed daily, the receptacle washed and all decayed leaves cut away, as these poison the water. If there are plant lice on the stems, remove these by running a strong stream of water over them.

Do not stand a bouquet in the sunlight nor near a radiator. Set it in a cool room during the night. Do not let the stems rest on the bottom of the container to block the free drinking of water. The slanting stem ends will prevent this. The bark should be trimmed back an inch or two from woody stems, or they should be crushed, or slit, to admit more water.

Never crowd flowers in a container. Renew the water as it evaporates or is drawn up. A wide mouth container is better than one with a narrow neck as it is good to have the water exposed to the air.

Motto displayed in the window of a Lancashire grocery store: "If 'tha' can't get what 'tha' likes then like what 'tha' can get."

Will Probably Protest

Managuan Women May Have To Disband Rocking Chair Brigade

One of Managua's oldest institutions, the rocking chair brigades, must go according to the Chief of Police. The rocking chairs and their occupants are said to block sidewalks, forcing pedestrians to walk in the streets, thus causing accidents.

At sundown the women of all houses pull out rocking chairs on the sidewalks and begin to rock. Besides being one method for cooling off, it also allows the women to chat with one another and to display feminine charms and gowns.

It is believed the women will protest the new order, as it vitally affects the established social system, for most women remain in their houses during the day.

Work Of Specialists

Horseshoe Nails Have Only Recently Been Made By Machinery

Horseshoe nails were the last nails to be made by machinery. Till recent years they were all forged by a small section of skilled specialists, so specialized that at the nail makers' annual dinners the makers of horseshoe nails always dined at a table set apart. The metal of the nail must be of a consistency to wear equally with the shoe, otherwise the horse would soon stand on six exposed nail points, or the nail would be driven deeper through the hoof at each step. For a time Sweden produced the best quality metal, but now the North of England supplies the best nails.

The harpy-moth caterpillar resembles an eight-legged, two-tailed cat.

The Romans developed stone arch bridges, some of which still are extant.

According to estimates, someone in America will be struck by a meteorite every 9,300 years.

Central Bureau Established

Information Listed Of All Air Raid Casualties In London

Anyone worried over friends or relatives in London air raids can now inquire at a Central Casualties Bureau at Scotland Yard, reports the London Sunday Dispatch. The bureau has been started after requests for information from all over Britain and from abroad. Since the heavy raids on London the police have collected particulars of casualties from hospitals immediately after the "Raids Passed," and notified the nearest relatives. If they lived in the provinces the local police have been told.

Comes In Very Handy

Infrared Lamps Used For Drying Many Things Around Home

More and more are infrared rays being utilized for finish-drying purposes. These heat rays in suitable reflectors have been utilized for several years to dry very rapidly the incense, for example, automobile bodies. Now small infrared lamps have been given the job of drying many things around the home. At the flick of a switch the housewife may soon turn on lamps to dry the family washing quickly and economically, cook food, or heat a room or an entire house in cold weather.—Scientific American.

A Straight Shooter

R.A.F. Pilot Bags Many Italian Planes In Middle East

Flying Officer Ernest Mason, a bearded Blackpool pilot who bags Italian planes faster than most National Hockey League marksmen score goals, has been awarded a Distinguished Flying Cross for aggression, initiative and dash in the middle east. He has shot down more than 13 Italian planes since Dec. 9. One sunny Sabbath he attacked nine machines and bagged three within eight minutes.

Working Day And Night

Thousands Of Nazis Building Jumping-Off Bases In Holland

About 600,000 Nazi troops and Labor Corps workers are toiling day and night on construction of gigantic airbases in Holland, preparatory to intensified air attacks on Britain, reliable dispatches reaching Dutch circles disclosed.

Zeeland, which is humming with activity, has been declared a prohibited area and has been completely isolated from the remainder of Holland. Dutchmen have found it impossible—even when speaking to visit their families—to obtain visiting permits unless Gestapo agents are fully satisfied with their credentials, it was said.

Every resident of Walcheren Island has been investigated by the Gestapo and at least 100 deported to other provinces.

Two main line tracks and numerous sidings have been added to the railway ending at Flushing to carry additional traffic. The railway personnel is almost entirely German.

The reports said the runway of the largest airbase on Walcheren is at least two miles long. Three smaller airbases have almost been completed but two of them were heavily damaged and equipped with dummy planes to deceive R.A.F. bombers.

Dozens of dredges are digging sand from the sea to raise the level of the lowlands and cover workshops with mounds of earth because underground airbases cannot be constructed in the soil available. The night work is carried out under arc lights until raiding planes are reported.

Plans for another gigantic airbase on the seacoast near The Hague have been drafted. Several large airfields are nearing completion in western Zeeland.

Hundreds of barges sunk by the Dutch during the German invasion are being raised and re-equipped. The shipbuilding industry is working full blast for the Nazis.

It was also reported that the Nazis had commandeered 20,000 of the newest and finest private automobiles and sent them to Russia to pay for Russian goods delivered to Germany.

Spirit Of The Vikings

Norwegian Sailors Refused Help Until U-Boat Was Destroyed

Although the Norwegian freighter Keret sank within 30 seconds when torpedoed by a German submarine in the Atlantic, a few members of the crew escaped drowning by clinging to a raft which broke loose from the sinking ship. As the survivors lay tossing upon heavy seas, the U-boat approached them.

"What ship was that we torpedoed?"

"Keret, of Bergen."

"How many men?"

"Twenty-one hundred."

"Thanks and goodbye!" and the submarine disappeared.

Shortly afterwards a British destroyer sighted the floating raft and came alongside. But the Norwegians were not concerned with being rescued.

Go after the U-boat first! We can wait."

For eight hours the sailors waited—in the wintry north Atlantic. Then the destroyer returned, after locating and sinking the submarine, and rescued the patient Vikings.—St. Thomas Times-Journal.

Little To Work On

Postal Authorities Found Owner Of Parcel Salvaged From Sea

Even the fictional detective generally has more clues than the post office department had in this case:

A gold signet ring bearing the initials J.W.C. and engraved "from Grace and Johnnie, Christmas 1940" was salvaged from the sea after a ship carrying Christmas mail to Canadian troops overseas was damaged by enemy raiders.

With no further clue than an accompanying letter, so damaged that officials could learn only that it was mailed from Calgary, postal authorities "tracked down" their man. He is Pte. J. W. Chambers, Royal Canadian Army Service Corps, Eng. Sender was Mrs. J. W. Chambers of Calgary.

Prairie People Like Apples

An odd thing noted about apple eating habits is that the per capita consumption of apples in the prairie provinces is higher than in the rest of Canada, despite the fact that few apples are grown there while all other provinces have numerous orchards.

Man has produced a pressure of 1,500,000 pounds per square inch in his laboratories.

R.A.F. DEMONSTRATES ACCURACY AS IT FINISHES OFF THE SAN GIORGIO

Used as a fortress in Tobruk harbor after it had been badly damaged by R.A.F. in January, Italian cruiser San Giorgio was again severely damaged and set on fire just before Tobruk fell Jan. 21. This air ministry picture shows the ship burning furiously amidst ships. Of 9,322 tons and with an armament of four 10-inch guns and eight 7.5 guns, the San Giorgio mounted heavy anti-aircraft guns in addition to her original armament after she had been turned into a fortress.

**WRITING DUL LETTERS
YOU MAY LOSE FRIENDS**

And you could so easily charm—
moving a few writing tricks. One
to imagine you're talking. You
almost starts by itself: "What
treat your letter was?"
Then just bubble along, giving the
less. "Wait till you taste my chick-
en croole!" In my Friday cooking
class I've learned to be a regular
empress!"

Keeping friends, going places,
getting jobs they so often depend
on! And you can lose too much
by not knowing correct forms.
Beginnings "My dear Mr. Hay,"
your course end with "Sincerely yours."
But after "Dearest Nancy" natural
and write "Lovingly yours." And
you'd never sign "Miss Doris Denny,"
at just "Doris Denny."

Learn the happy, profitable art of
letter-writing. Our 32-page book-
let gives right usage, sample types
friendly and business letters.
Succubary aids for lively writing.

An American Traveller

Colonel William Donovan Has Visited
Many Countries On Mission

Prime Minister Winston Churchill
recently took his American visitor
seeing Greece, The American, ath-
letic, modest-mannered and 57, was
once known as "Wild Bill" of the
fighting 69th.—Colonel William J.
Donovan. It was the Colonel's third
visit to London within a year. He
was there last August, for reasons
believed closely linked to American
foreign policy. He returned last De-
cember on another mission, then
journeyed eastward. The mission's
purpose has never been told, but
some think the colonel is serving as
resident Roosevelt's eyes in troubled
areas. He has seen much.

In the last two months the Colonel
has been to Cairo, Alexandria, Ath-
ens, Sofia, Belgrade, Ankara, Madrid
and Liabon, and has visited Dublin.
In most of these cities he has talked
with the heads of state, but he has
aid little for publication. Only two
missions have marred his travels.
The French apologetically declined to
let him pass through Syria, and in
India he lost his wallet. It was
quickly recovered by Bulgarian
police.—New York Times.

Mars, the planet, was named for
the god of war because of its red
color.

Dissolving salts in water makes
the water more effective in extin-
guishing wood fires.

The thickness of gold leaf ranges
from 1,200,000th of an inch to 1,250,-
000th of an inch.

About some people the worst
thing you can say is the truth.

The World of Wheat

H. G. L. Strange

The Dominion Government has announced its wheat policy for this coming crop year. The Government will endeavor to induce farmers to sow to wheat not more than 65 per cent of wheat acreage. If this is done almost half of the entire wheat sowings this spring will be on summerfallow.

Here is a wonderful opportunity for farmers to put a large acreage of clean land into good seed, the product of which would be available to sow larger acreages when markets are open up after the war.

Because the wheat acreage for each farm will be reduced, all the more important it is that farmers should make every acre bring in the most money. Better seed increases the quality, hence the grade of the grain, and so brings more money to the farmer. In addition, of course, the higher quality wheat becomes more saleable on world markets, particularly in those countries which will probably endeavor, after the Peace, to grow large quantities of their own wheat, which being of a comparatively low quality will need some high quality Canadian wheat mixed with it to make a palatable loaf of bread.

It seems, then, that there never was a time better than this spring for farmers to sow some summerfallow to high quality Registered or Certified seed.

U. F. C. Notes

U.F.C. MEETING

At a meeting of the U.F.C., Alta. section, held in Hedley's hall on Friday afternoon, March 21st, it was decided to inaugurate a farmers' exchange where members of our organization and others who have miscellaneous articles for sale or trade, may list them and where members can list articles which they are in need of. A committee was appointed consisting of Mr. Edwin Sanders, chairman; F. F. Thurston and R. Dempsey. A list of articles is being prepared and will be posted in a conspicuous place in the village within a few days.

The next meeting will be held in Hedley's hall on April 18th when a big attendance is expected.

ACREAGE BONUS ON RENTED LAND

Rented land to be eligible for bonus for the 1941 crop season must be covered by a written Farm Lease, properly drawn up and executed not later than May 1st, 1941, and covering a period at least until November 1, 1941.

This requirement under the Prairie Farm Assistance Act will be strictly enforced.

No bonus will be paid on any rented land not conforming with the above ruling, even though otherwise eligible.

SEEDTIME and HARVEST
By Dr. K. W. Neathy
Director, Agricultural Department
North-West Line Elevators Association

Seed Grain
New Seed is purchased for one or more of the following reasons:

1. To maintain purity.
2. To adopt a new or different variety.
3. To begin growing a new or different crop.
4. Because crop was damaged by frost, sprouting, etc.

When buying new seed it is always wise to buy the best available. This, of course, means buying registered seed if possible, and, if not, certified seed.

To maintain purity, it is not necessary to buy a sufficient quantity of expensive seed to replace the old entirely the first year. It saves money to sow a seed plot with pure seed, and to take every precaution against the occurrence of volunteer plants of the same crop and against mechanical mixing. Suppose that a farmer commonly has 150 acres in wheat; a seed plot of fifteen or twenty acres will usually provide ample seed for the next year. The plot selected should be summerfallow, and should be located at least fifteen or twenty rods, preferably further, from other wheat. Exercise extreme care in threshing, cleaning and sowing.

If a new variety is to be adopted, the same practice may be followed, though even greater care should be taken to prevent the old variety from volunteering. It is seldom necessary to replace a variety completely in one year. A thorough job can be done in two years, and it is much cheaper.

If frost, sprouting, or some other injury necessitates new seed for the entire farm, and resources do not permit the purchase of enough registered or certified seed for all needs, then at least a few bushels for a seed plot should be obtained.

SEEDTIME and HARVEST

By Dr. K. W. Neathy
Director, Agricultural Department
North-West Line Elevators Association

Will Soil Wear Out?

The answer is definitely yes, unless present methods of crop production are altered.

Four years ago, the Department of Soils of the University of Alberta made a study of the nitrogen and organic matter content of cultivated soils and neighbouring virgin sod at 32 widely separated points in Saskatchewan and Alberta.

In this study, the four major soil zones (black, dark brown, brown and gray) were all represented. It was found that, as a result of cultivation, the black soils had lost 18% of the original nitrogen and 21% of organic matter. The dark brown soils lost 22% of nitrogen and 26% of organic matter. The loss in brown soils amounted to 20% of the nitrogen and 27% of the organic matter. The gray soils, naturally less fertile than the others, were found to have lost 35% of the original nitrogen and 42% of the organic matter.

The above figures were obtained from analysis of the surface six inches of soil. In general, subsoil losses of nitrogen were slight, but organic matter losses considerable.

The authors state (Scientific Agriculture, Vol. 19) that "... it is clear that the straight grain and fallow system has not maintained the nitrogen ... or organic matter content of western Canada prairie soils."

THE GOVERNMENT'S WHEAT POLICY

The Government's plan to permit a maximum delivery of 230 million bushels of wheat (about 223 million for the west) for the crop year 1941-42, will mean a reduced wheat income to western Canada for the coming crop year of probably 133 million dollars.

Recognizing that such a reduction in income is more than the west can bear, the Dominion Government proposes to give compensation to prairie farmers. The exact amount and the nature of the compensation cannot, however, be determined until the Government policy is further explained and clarified.

One Government statement is that the west will need a total income from all agricultural products of 325 million dollars.

Even though compensation of one kind or another is paid to prairie farmers to bring their total revenue up to 325 million dollars, this would still mean a revenue for the coming crop year 1941-42 of 83 million dollars less than the farmers received for the same products for this present crop year 1940-41. The loss of 83 million dollars in one crop year would certainly bring considerable hardships to the West. The farmers would probably manage somehow to get along, but after farmers had paid their expenses for living and production there would be very little money left for creditors, for the payment of Dominion taxes, for the purchase of War Saving Stamps, War Saving Certificates, War Bonds, for subscription to the Red Cross, and for the support of other war activities; for it is to be remembered that even the revenue of this present crop year of 408 million dollars was none too great. It certainly did not afford our farmers on the average anything approaching luxury purchases.

During the past 60 years our prairie farmers have added from wheat alone some 10.7 billion dollars to the economy of Canada. In view of this, and of the great value of war-made available to Canada and to Britain at a very low cost, and in view further of the exceedingly high hourly rate of wages being paid to industrial workers in the manufacturing plants making munitions and equipment for the government, it certainly seems as though our farmers are entitled to the most generous consideration by the Dominion Government. It certainly seems, too, that it would be in the national interest, during war time to maintain our farmers and the whole economic structure of the West in a financially healthy condition so that our wheat growers and our whole wheat industry can, after this war, continue to make the same valuable contribution to the economy of the whole of Canada as they have done in the past 60 years.—Searle Grain Company, Limited.

One roustabout to another: Will you lend me \$20 and only give me \$10 of it? Then you'll owe me \$10 and I'll owe you \$10 and we'll be straight.

Best time to clean the egg beater is immediately after using it—before the egg dries and makes washing difficult.

Fruit gelatin mixtures gain in flavor and nutritive value if fruit juices are substituted for the liquid called for in the recipe. Left over canned fruit juices are as good as juice from fresh fruit.

For the things that are not given to a fighting man with his uniform... things that are not part of his military equipment... things of the spirit... Canada's fighting sons, wherever they may be, rely on you.

The Government provides them with uniforms, rifles, ammunition—but for comforts—recreations and wholesome opportunity to make their precious moments of leisure a genuine boon... they rely on you.

Of course you help to buy airplanes, guns, ships, tanks—BUT for the things that express to the soldier the affection and thoughtfulness of the folks back home... he relies on you.

Six great national organizations labour unceasingly to provide him with those things.

They can do it only with your money.

Your money started this work—your money is needed to carry it on.

The need is urgent. Be generous.

Let the volunteer helper who calls on you carry back your pledge of fullest support for our fighting men.

CANADIAN WAR SERVICES FUND
Needs \$5,500,000

B. CHAMBERLAIN, ESQ., Calgary CHAIRMAN FOR ALBERTA: JOHN D. DOWER, ESQ., Edmonton

Government House,
OTTAWA.

March 1941

Dear Senator Smith:

Princess Alice and I are glad to become Patrons of the Canadian War Services Fund, for we realize the immediate assistance the member organizations have given to our Armed Forces at home and abroad. We have been privileged to see these War Services at work in Canada and Great Britain, and we are greatly impressed with the excellent work they are doing.

We cannot emphasize too greatly the importance of providing pleasant recreation, healthy relaxation and comforts for our soldiers, sailors and airmen, and we are sure that nothing contributes so much to their physical and spiritual well-being. These services signify to them the affection and thoughtfulness of "the folks back home".

The Salvation Army, the Y.M.C.A., the Y.W.C.A., the Canadian Legion, the Knights of Columbus and the I.O.D.E., have united in the Canadian War Services Fund Campaign, and we commend their aim and purpose to all Canadians.

Yours sincerely,

Major-General Sir George VI, G.C.,
National Chairman,
Canadian War Services Fund,
200 Bay Street,
Toronto, Ont.

NEWS ITEMS FROM KINSELLA

Mrs. B. Wachter spent last week in Edmonton.

Mr. G. C. Horner of Winnipeg returning from a business trip to Calgary, spent a day with relatives at Kinsella, J. F. Murray and family.

A shower was held in honor of Miss Alice Turnbull at the home of Mrs. L. Clay on Tuesday, March 25th.

Mr. Chas. McAdams is a patient in the Viking hospital.

The Kinsella school has been closed on account of measles in town and district.

The Womens Institute will hold their monthly meeting in Lee's hall Saturday, March 29.

Viking Items.

J. A. King, one of the organizers of the war services fund for Northern Alberta, was a visitor in town on Monday in connection with the meeting held here for that purpose. Mr. King is also chairman of the liquor control board for Alberta.

Fred Roddick, son of Mr. and Mrs. R. H. Roddick, left last week for Brandon, Man., where he has joined the R.C.A.F. as a student pilot. He writes home that he is well taken care of and the meals are much better than he expected.

Loch Campbell, former high school teacher here, has joined the R.C.A.F. radio division and is in training in Toronto.

Viking churches were well filled last Sunday in response to the request of the King for an Empire day of prayer. There were general expressions of humility and gratitude and prayers for a just peace following victory. All denominations co-operated in loyal observance of this worldwide period of prayer. At St. Mary's Rev. Fr. R. J. O'Neill presided over the Catholics; the Anglican service was conducted by Rev. Cyril Clarke. Both these morning congregations were large. And in the evening the United Church, Rev. Harold G. Lester delivered the sermon, though the entire service was conducted by the Young People's Union. Those taking part on the platform were Ursula Webber, Dorothy Williams, Maevie Lee, Margaret Hoskins and Edith Harrison. Besides the choir the Viking high school glee club under the leadership of Mr. Elliott assisted with the music. The church was filled almost to capacity.

An organization to conduct the War Services Fund drive in the Viking district was set up at an enthusiastic meeting held in the Elks hall on Monday evening. The president of the local Canadian Legion outlined the purposes of the drive to those present by stating that the funds for the six organizations including the Canadian Legion, Salvation Army, Y.M.C.A., Y.W.C.A., Knights of Columbus and the I.O.D.E. The objective for all of Canada is \$5,500,000 and the money would be apportioned necessary to finance the war efforts of each body. This is the only drive of its kind to be held in Canada this year, and each and everyone is asked to give until it hurts. The funds are used for entertainment, education, sports, smokes, coffee and comforts for the soldiers, sailors, and airmen on active duty. You can't let the boys down now.

The following officers and representatives were elected to make arrangements for the drive:

Chairman, H. C. Russell; vice-chairman, Rev. O'Neill; secretary-treasurer, Jas. L. Smith; representative on the executive for the Salvation Army, A. B. F. Cary; for the Y.M.C.A., S. Leford; for the Y.W.C.A., Mrs. F. Harrison; for the Knights of Columbus, J. L. Slavik; for the I.O.D.E., Mrs. A. E. Walters; for the Canadian Legion, J. H. McLellan.

Further meetings of the executive will be held shortly when canvassers will be appointed and other arrangements made to start the drive as soon as possible.

The local Red Cross Society is asking that all appeals for support in aid of the Red Cross by all auxiliaries come for the next month or six weeks and that all funds raised by bridge parties, dances, entertainments, etc., be turned into the War Services Campaign Fund. However Red Cross work such as knitting, sewing, etc., will continue as usual.

The Pentition, B. C. Herald was destroyed by fire last week, the plant and building being almost a total loss. Harold Wood, formerly of the News staff, has been foreman in the Pentition office during the past year. The paper is now being printed and published at Kelowna, a distance of forty miles from Pentition and Harold is kept busy on the night shift.

Canadian War Services Ready For U. K. Invasion

Ottawa—Canadian war services are fully prepared to follow Canadian troops into action in the event of invasion of England or when action is taken to the enemy," stated Col. E. A. Deacon, director of auxiliary services, department of national defence. Col. Deacon's duties bring him in close touch with the work of the six war services which launch a nationwide appeal for \$5,500,000 with which to carry on this year.

Already serving in bombed Britain and with the troops who are on constant battle stations in England and Canada, the Canadian Legion, Knights of Columbus, Salvation Army, and Y.M.C.A. are equipped and ready for any development of war.

At Dunkirk, the work of the British Y.M.C.A. and the Salvation Army was outstanding and both organizations suffered heavy losses of materials. More recently, in the bombing of London, of Liverpool, Birmingham, Coventry and Swansea, the war services have dashed in amid bombs and fire to do notable rescue work among the civilian population. Several times they have accompanied Canadian troops in England on their sudden movements to ward off threatened invasion. The record of the Canadian Y.M.C.A. and Salvation Army in the last war is one of untiring service to Canadian troops in action and behind the lines.

"As troops move into action, the need for the services rendered by the Canadian Legion, the I.O.D.E., the Knights of Columbus, the Salvation Army, the Y.W.C.A. and the Y.M.C.A. is increased rather than diminished," said Col. Deacon. Entertainment, athletics, games and personal services will be even more necessary in concentration and have centres behind the lines than they are in army camps today. Hostels in leave centres will still be in great demand and work among the wounded in military hospitals will be enormous. Mobile canteens and hot beverage care, a development of the present war, will enable the war services to keep in close touch with troops in action and will accompany troops on active service just as they now attend troops on manoeuvres.

"The people who own these cars have no idea of the comfort they bring," stated Brigadier E. W. Hadenby, M.C., upon his return from England and Dunkirk. "They go out in all hours of the day or night, good weather or bad, and you really want it most in the bad weather. Time and time again, the cars would come up over the hill and the troops just simply cheered."

War service workers attached to army and air force units are supplied with compact kits which contain athletic equipment, games, writing paper, and other materials with which to maintain the spirits of the men with whom and for whom they work. Each war service worker overseas is carefully selected on the basis of experience, physical fitness, initiative and other qualities which will enable him to carry on under all the stresses of actual warfare. Upon these men

the military authorities depend for many services and in the heat of battle they are needed more than at any other time. Where the battle rages there they will be.

VETERANS OF PRESENT WAR TO BE RECOGNIZED AS EX-SERVICE MEN

Ottawa—The term "ex-service men" will henceforth include those who have served with the active forces of Canada during the present war as well as veterans of the war of 1914-1918. Emphasis is placed on this fact in an instruction from the department of national defence to those in charge of government works under the supervision of the department suggesting that other things being equal, unemployed ex-service men receive preference on these works.

DEHORNING CALVES

The best time to dehorn cattle is when they are calves from 3 to 5 days old. At this time caustic soda or caustic potash applied to horn buttons will prevent any growth of the horns. These may be obtained at any drug store for a few cents.

It is necessary to handle the caustic with care. Wrap the stick in paper, leaving one end free. The skin over the horn button should be washed with warm soapy water and dried with a cloth. Moisten the uncovered end of the caustic stick and rub it gently on the horn buttons—first one side, then the other, repeating the operation several times, allowing the caustic to dry between applications.

Great care should be taken to prevent the caustic coming in contact with the surrounding skin or getting into the eyes. Vaseline or lard may be rubbed into the hair surrounding the horn button.

Be careful to avoid using too much water on the caustic stick and if it is raining, keep the calf inside so that the caustic will not be washed off.

FATHER OF MRS. J. B. STOLDS DIES AT BAWLE, ALTA.

Bawle, March 17—There was genuine regret when the death of Mr. M. Bergquist on Sunday evening became known. He succumbed to a heart attack which he suffered on March 6th. Deceased was 72, a highly respected pioneer farmer and member of the Lutheran Church board. Mr. Bergquist and family located east of Bawle in the fall of 1902. They improved and built up their homestead until now it is outstanding in the community and a fine memorial to their enterprise. A few years ago they purchased a home in Bawle and retired leaving the farm home with their son, Percy. Mr. Bergquist leaves his wife, two daughters, Mrs. Jacob B. Stolds of Viking, and Miss Alida Bergquist, R.N. of Rochester, Minn., and one son, Percy, and four grandchildren. Camrose Canadian.

If you want to add extra luster to painted woodwork, add a little vinegar to the wash water.

FOR FREEDOM

By G. L. Creed, RJOAF.

What is this Freedom worth to you, my friend?
Freedom to live and love from day to day
Freedom to go in Peace your chosen way
Freedom to keep the Faith you hold most dear,
Freedom to worship therein without fear,
Freedom to choose your rulers, and to change,
Freedom to stay by fireside or to range,
Freedom to think and speak your mind aloud,
Freedom to stand alone or with the crowd,
What would it cost you, should this Freedom end?

What is this Freedom worth to you, my friend?
Ask any one of those millions who
Once took its Gifts for granted—just like you!
Ask some poor refugee whose haunted eyes
Still see the Horrors left 'neath native skies
Ask countless victims of the Nazi lust
Who placed in Blind Neutrality their trust
Ask—and remember ere it be too late
That what was theirs might also be Our fate!
What would you give this Freedom to defend?

To save this Freedom, you and I, my friend,
Must share the privilege of Sacrifice
And each, as he is able, pay the price!
For who in Freedom shall deserve to live
Who, for its sake, is not prepared to Give!
To win for Man this Freedom, men must die
And in their distant unmarked graves will lie
The buried hopes of Mothers, Sweethearts, Wives,
Whose sacrifice has been their loved ones' lives
And so, TO FREEDOM GIVE—FOR FREEDOM LIVE!

GROWN IN SUNNY, SOUTHERN ONTARIO

The Mounting Toll

With the approach of the season when roads dry up under the gentle influence of spring sunshine, when the birds sing their mating songs and all nature heralds release from the bonds of ice-locked winter, the time has arrived when grim death will appear on the highways with fresh sharpened scythes ready to "mow them down."

On the one hand a joyous reawakening to new life and vigor; on the other, dire destruction, injury and death.

How many people during the coming summer are destined to spend weeks and months of agony on hospital cots; how many more are going to be imprisoned in a wooden or metal casket and covered with a pile of clouds, because of a moment of carelessness, a few seconds of recklessness on the part of someone on the open road?

The fact that most automobile accidents are attributable to carelessness or recklessness on the part of drivers cannot be over-emphasized. Once this fact can be driven into the motorists' consciousness, there may be some hope that accident toll figures which continue to climb year by year will be reduced.

Analysis of statistics, where causes of crashes can be determined, show clearly that at least two out of three accidents in which one or more automobile are involved can be credited to mistakes made by the drivers, and not the least of them is fast driving.

A survey of the toll of accidents in a recent year in the United States and published with comment in pamphlet form by one of the life insurance companies demonstrates the need for greater caution by the man behind the wheel once he gets out on to the public thoroughfare, and particularly the still greater need for restraint when driving during the hours of darkness.

Reviewing The Causes

This survey showed that the rate of death per accident which involved exceeding the speed limit was 35 per cent. worse than the average death rate for all accidents due to improper driving practices. "In accidents resulting from reckless driving, the rate of death was 32 per cent. worse, and when cars ran off the roadway (because of too much speed, very likely) the rate of death was 37 per cent. worse than the average."

And some of this recklessness and the dire results which it brought in its train were definitely attributable to the use of liquor by drivers of the cars involved in crashes; for we read: "Of all drivers in accidents, 3.1 per cent. were declared to have been under the influence of liquor. But of all drivers in fatal accidents, 6.8 per cent. were declared to have been under the influence." Thus the fatal accident experience of drivers intoxicated was 118 per cent. worse."

So we find that most of the accidents involving injury and death could have been avoided had the driver exercised reasonable prudence and care; that a very substantial percentage of these accidents would not have occurred had the driver travelled at reasonable speed, and that in too many cases, abstinence from liquor would have eliminated much suffering and many funerals.

There is another factor which may be a contributing cause of an additional number of accidents in Western Canada this spring and summer and that is the condition of the roads. Due to lack of funds, the outcome of a period of years of depression, highways have not been kept in the same state of efficiency and good repair that would have been the case had the west been prosperous. The disintegration which has resulted has been accentuated by an increasing use of heavy and heavily-laden trucks for commercial traffic. These two causes combined have resulted in highways which are not as safe as they ought to be and this condition alone should urge the motorist to use discretion when tempted to press the accelerator down.

A Dual Campaign

If the mounting toll of misery, suffering and death occasioned by the reckless use of the highways is to be curbed and brought down to less startling figures than appear in the annual statements of accident records, it would appear that an all-out campaign of education must be carried out, until every driver on the highway is thoroughly alive to the dangers in which carelessness involves himself and others, and is willing to school himself to the exercise of care, caution and courtesy on every occasion and at all times.

It is true that efforts have been made in this direction, as for instance that safety campaign conducted by the R.C.M.P. over the radio. What has been done in this direction to date is not enough. Every agency must be pressed into service to carry on a mass educational campaign among motorists until the exercise of reasonable care is thoroughly grounded into their consciousness and becomes second nature as soon as they get behind the wheel.

Coupled with this there should be complete co-operation between the public and all other agencies and authorities to ensure enforcement of the law and the regulations which have been laid down to make the use of the roads safe for the general public whether afoot or afoot.

When public conscience is fully aroused to the necessity for this dual effort it can be taken for granted that injury and death on the highway will be reduced to the minimum, but until then, it will not.

Women Are Like That

"Mrs. Williams always asks the price of anything new that I happen to be wearing," said Mrs. Brown. "Rather a cheek, don't you think?" "Decidedly," replied Mrs. Black. "What has she been trying to find out recently?" "She wanted to know how much I paid for this dress."

"What an inquisitive creature she must be. How much did you tell her?"

The Germans have managed to drag King Boris' Sofia into the living room, but it will be interesting to see what happens if they try to put their feet on the Ottoman.

FEMALE PAIN

Women who suffer painful, irregular periods with nervous, moody spells due to blood impurities should try Lydia E. Pinkham's Vegetable Compound simply because it relieves such distress. Pinkham's Compound is made especially to help women get on so smiling thru difficult days. Over 1,000,000 women have found amazing benefits. WELL WORTH TRYING!

The Little Town

Oh, I would praise the little town Where news, by word of mouth, is told; Where men salt slender earnings down, And sun themselves when they are old; Where friends are proven, neighbors care, If gladness comes, or grief is borne; Where children learn to give and share, And living rooms are family worn; Where one green cemetery leaves The summer drought, and all the bits Stay flower-fresh, and certain graves Are favored with forget-me-nots; Where help is always near at hand, And honor comes to him who strives; Where people know each other, and The drama of each other's lives!—Jane Sayre, in the Country Gentleman.

Waitresses in most cafes in Japan are called "Mr. Girl."

Must Be Treated Decently

Non-Commissioned Officers Not Allowed To Swear At Men

One of the instructions given to non-commissioned officers in the American army who are drilling the new selective service recruits is that they must not swear at the men. The same restriction applies to the Canadian Active Force and the Reserve Force. Officers being "gentlemen," it is presumed that they would not swear anyway.

This marks a distinct change from the old days, when the drill-sergeant and the lower grades of non-coms used to abuse the men in the most appalling manner. A great deal depended upon the character of the individual with stripes on his arm. Many there were who, either because of home training or sheer disinclination to bully young men, obtained the necessary results by using plain English. Others, however, swore hard because they were the swearing type, and perhaps also because they believed a man could not be made into a "tough" soldier unless he was treated roughly. Some of the men who drilled recruits in the last war were utter brutes. There was quite a flurry in British army circles for a while when a famous author who enlisted in a Guards battalion wrote a book about his experiences and scathingly denounced the hard-swinging, ruthless treatment meted out to young men who left good homes to serve their country.

The United States order is reported to have been the outcome of letters written home by men in the first drafts. They had not been used to being sworn at and they resented it. Men who were in the British forces in the First Great War suffered in this respect, and since the Armistice, swearing at companies of men has been prohibited in the building-up of the new army. Swearing only makes recruits nervous and resentful, and as the armies of to-day comprise men who have been accustomed to being treated decently by their employers and other men over them, it is right that they should be decently treated in return.

Swearing is a sign of weakness anyway. The man who cannot train his men without using foul language is not fit for his job.—St. Thomas Times-Journal.

From Force Of Habit

Small Thing Brought About Capture Of British Prisoner

A German prisoner who had escaped from a North of England camp was recaptured in a Sheffield bus because he clicked his heels when the conductor handed him his ticket.

Colin Spittle, the conductor, has received a letter from the corporation transport department congratulating him on his watchfulness.

The Nazi, about 25 years old, was disguised in a check cap, a sports coat and flannels, and carried a small attaché case. He asked for his ticket in fluent English, handing over a florin.

But when he got it he clicked his heels sharply, from force of habit. Mr. Spittle pretended not to notice, but told the driver to stop when he saw a policeman.

The young man could not produce an identity card when he was questioned, and tried to get away. But he finally confessed.

Baseball Technique

U.S. Army Has Developed New Type Of Hand Grenade

Assuming that the average American youth is a baseball player, the U.S. army has developed a new type hand grenade that resembles a baseball and weighs only one-quarter of an ounce more.

The grenade is made of light metal or plastic. It will be particularly effective against machine gun nests and similar small targets whose destruction requires accurate pitching. A supplementary detonator causes the grenade to explode if handled after it has thrown its contents.

Army officials explain that the regulation hand grenade is too heavy and is likely to throw the pitcher's arm out of joint if baseball technique is used.

Canada's Fibre Industry

Indications point to a successful year in the Canadian fibre industry. According to 1941 according to present plans, states the fibre division, Ottawa, Dominion experimental farms, will in all probability be about double that of 1940, when it was about 21,000.

Make Your Choice

The Toronto Saturday Night asks: "Which are you passing—the one that buys four War Savings Stamps, or the one that lets somebody else do your job of saving civilization?"

Germany's U-Boat Ace

Was Killed Presumably In R.A.F. Attack On Base At Brest

Nearly every essay on the submarine problem refers to the curious and hopeful fact that about 60 per cent. of all the U-boats damaged in the first World War was done by about 5 per cent. of the German submarine commanders. It is an index to the difficulty of getting and training the right men, without whom even swarms of boats are of limited usefulness; and it adds its peculiar interest to the death of the famous Lothar von Arnauld de la Periere, who was the greatest "ace" of them all. The Germans said that he was killed in an "accident." The British believe that the "accident" was the R.A.F. raid the same night on the submarine base at Brest, whence Von Arnauld de la Periere, as a vice-admiral, was presumably dispatching new submarines to repeat his efficient exploits. If so, it was an ironic fate for the man who crawled through so many seas, faced so many perils and sank 200 ships unscathed—a small part of the complex irony which this new war, continuing the old one, engenders.

He is credited in one tabulation with the destruction of 400,000 tons. Only two others came anywhere near the total: only five in all sank as much as 200,000 tons, and only 20 destroyed more than 100,000 tons each. His was a dashing and apparently friendly figure (he was unperturbed when, commanding the new cruiser Emden on a good-will tour in later years, he was received by the celebrated Huey Long in pajamas); the British respected him as one who played his murderous game as fairly as possible, but the Italians put him on the treaty list of war criminals. Such is this war. The Italians were his gallant allies, when the British killed him with a bomb from the air weapon which has grown into a menace both to submarines and their bases such as Von Arnauld de la Periere never had to contend with. One wonders a little about that bomb, about what other damage it did, about the real effect of the steady pounding of the submarines bases on supply, repair, outfitting and above all on the training, morale and survival of the precious crews and commanders who can alone make submarine warfare effective.—New York Herald-Tribune.

SELECTED RECIPES

KRISPIES MARSHMALLOW SQUARES

½ cup butter
 1 pound marshmallows (about 2½ dozen)
 1 teaspoon vanilla (if desired)
 1 package Kellogg's Rice Krispies (5½ oz.)

Melt butter and marshmallows in double boiler. Add vanilla; beat thoroughly to blend. Put Rice Krispies in large buttered bowl and pour on marshmallow mixture, stirring briskly. Press into shallow buttered pan. Cut into squares when cool.

Yield: 10 2½-inch squares (10 x 10-inch pan).

Note: Nut meats and coconut may be added.

Two ounces of melted unsweetened chocolate or four ounces of melted semi-sweet chocolate may be added to the marshmallow mixture just before pouring over Rice Krispies.

EGGS, GARDEN STYLE

4 eggs, beaten
 12 Christie's Premium Soda Crackers, crumbled
 2 tablespoons grated Canadian cheese
 ¼ cup milk
 Salt and pepper
 3 tablespoons butter
 1 cup diced cooked vegetables
 1 tablespoon minced parsley

Beat eggs slightly, add crumbled crackers and cheese; stir in milk and season. Melt butter in saucepan and add cracker mixture. Stir over heat, and when mixture begins to thicken, add diced vegetables and continue to cook until as thick as scrambled eggs. Garnish with parsley. Six portions.

When Country Is Free

Paderewski Plans Concert Tour To Celebrate Rebirth Of Poland

At 30, Ignace Jan Paderewski looks forward to one more triumph—concert tour—to celebrate the rebirth of a free Poland.

Until his nation can throw off the conquerors' yoke, Paderewski's piano is still. From a seaside villa at Palm Beach, Fla., the aged, ailing statesman is directing Polish relief.

"It is easy to get information past the lax Soviet censors," he said. "More than 600,000 Poles, mostly women and children, have been forcibly removed from their homes to the Soviet empire—and left to die. Already we estimate from 10 to 15 per cent. of these people have died, and many more are doomed."

Goering claims to be descended from an Englishman. If that's true he has certainly descended a long way.

WHY BOTHER WITH "TEMPORARY RELIEF" WHEN CONSTIPATION CAN BE CORRECTED?

Perhaps your constipation is the common type due to lack of the right kind of "bulk" in the diet. If so, how much more sensible it is to try to correct it, rather than to rely on harsh cathartics that bring only temporary relief!

KELLOGG'S ALL-BRAN, a nut-sweet, delicious cereal, supplies the proper "bulk" to help you keep regular. Eat ALL-BRAN every day,

and drink plenty of water. See how this "Better Way" to treat constipation makes your old "troubles" disappear! But, remember, ALL-BRAN doesn't work like purgatives... it takes time.

Ask your grocer for **KELLOGG'S ALL-BRAN** today. In two convenient sizes. Or get it in individual serving packages at restaurants. Made by Kellogg's in London, Can.

New Ex-Service Men

Men Who Have Served In Present War Accorded Recognition

Men who have served during the present war with Canadian active forces are accorded recognition as "ex-servicemen" along with veterans of the First Great War, defence headquarters announced.

Instructions addressed to heads of branches and divisions, and district officers commanding, said the men are to be included in the "ex-service" category in connection with hiring men for government works under direct supervision of the Defence Department.

In such cases, "other things being equal, preference should be given unemployed ex-service men," the instructions said.

100 Years To Recover

The morals of savages are being inculcated in millions of German children, said Herwald Ramsbotham, president of the Board of Education, in a speech at Salford, Lancs. He added "it will take Germany at least a century to recover from the appalling spiritual and intellectual damage inflicted by the Nazis upon German children."

A Fascist paper invites the United States to survey the Italian colonies in Africa and see how well they are run. This offer should be accepted promptly, because the supply is running low.

The World's Cattle

Figures Giving Number In Different Countries Are Rather Astonishing

The St. Thomas Times-Journal says that, astonishing as it may seem, there are about 13,000,000 cows in the United Kingdom and only 8,000,000 in the Dominion of Canada. It is in fact too astonishing to be credited. Latest official statistics show 8,224,000 cattle on Canadian farms, but only 3,933,300 milk cows. The United Kingdom in 1939 reported 8,875,200 cattle of all kinds. Germany, by the way, had 19,911,200 cattle in that year. France 15,621,700, these countries leading Europe with exception of Russia for which 1939 statistics are not available, but which in 1938 reported 63,200,000 cattle.

Smiths Outnumbered

Minneapolis, no slave to convention, upsets the rule that makes Smith the commonest family name in the United States. The telephone book lists four times as many Johnsons as Smiths and three times as many Andersons.

The Main Causes

Out of every 100 persons rejected for life insurance by a major company, 27 had high blood pressure, 24 indulged excessively in liquor and 21 had serious heart impairments.

The title of rabbi is accorded Jewish scholars of eminence, as well as those in the ministry.

A GROCER PUT ME WISE,

PARA-SANI

PURE-HEAVY WAXED PAPER

AN APPLEFORD PRODUCT

MADE IN CANADA

APPLEFORD PAPER PRODUCTS LTD.

WAREHOUSES AT

WINNIPEG - REGINA - SASKATOON - CALGARY - EDMONTON

"Sure I'm a crank for cleanliness—but it never occurred to me that waxed paper should be as unquestionably pure as food itself. Thank goodness a grocer put me wise. From now on it's Para-Sani—pure and safe food protection."

WORKING HIS DARDEST ON THAT REMAINING SPARE

—New York World-Telegram.

Nature Has Other Ideas

But Swedish Scientists Claim They Can Keep Leaves From Falling

One feels that some earnest thought ought to be devoted to the subject before widespread applause is offered to the two Swedish scientists who are reported to have discovered a process whereby leaves will be prevented from falling from trees in autumn. They have, it is now claimed from Stockholm, isolated a substance that will arrest whatever activity it is that causes leaves to drop off as winter approaches. But do we want leaves that stay on all the year round? Obviously poets and moralists do not, for they have been writing most feelingly for centuries about the touching spectacle presented by the fluttering to the ground of autumnal foliage. And gardeners, who value leaf-mould most highly, would be distinctly irritated if the raw material for that important aid to horticulture remained high out of reach on the branches where it sprouted. And how would the new leaves emerge in springtime if the old ones were still congesting the branches?

Our existing evergreens are not a very exciting form of decoration. The eighteenth-century Earl of Shrewsbury who laid out most of the gardens at Alton Towers with evergreen timber only succeeded in producing a spectacle which is more curious than attractive. And when someone suggested for him the tribute "He made the desert smile," the comment of William Morris, who had inspected the result, was "And a very polite desert not to laugh outright." All things considered, the Swedish scientists had better leave the autumnal transformation scene to take its usual course.—Manchester Guardian.

The people of Switzerland have contributed nearly \$1,000,000 toward the reconstruction of Finland, reports the Finnish Information Centre in New York.

Women's favorite color is red, men's blue, psychologists declare.

Had To Abandon Demand

Nazis Could Not Compel Norwegian Workers To Leave Country

When the Nazis recently asked for the transfer of from 15,000 to 20,000 Norwegian workmen to Germany—half the country's unemployed—the Norwegian Labor Federation compelled them to abandon their demand, it is now revealed in messages reaching Stockholm from Oslo.

It is now known that the Nasjonal Samling, the German puppet government headed by Quisling, accepted the proposal for such a transfer from Germany, but that the Norwegian Labor Federation protested when it was learned that the workers would receive the same wages as the German workers, which are less than those paid in Norway.

The federation also protested against taking the unemployed and insisted that only volunteers should be taken.

The conflict was then referred to the German commissar for Norway, who ruled that the labor protest be accepted and the transfer made voluntary.

It is therefore expected that very few Norwegian workers will take advantage of this offer.

Not So Many Missiles

There are fewer missiles in the Canadian forces in this war. For one thing enlistment is being done more carefully and examinations are more thorough and extensive. And for another, the Red Cross inspection of socks and other articles, which women are knitting for soldiers is believed to be more efficient.

Putting It Nicely

A notice at an office in a military establishment in Scotland, where civilian callers sometimes cause a draught, reads:

"This is a free country. You may open or shut your eyes, ears or mouth as you please. But keep this door shut."

Shem, eldest son of Noah, is claimed as their ancestor by pure Arabs. Bedouin Arabs trace their descent back to Ishmael.

Dainty Roses Bloom in Cross Stitch

THE HOUSEHOLD ARTS CO. LTD. PATTERN 6906

The outstanding vogue in household linens—embroidered bed sets. Do this colorful cross stitch on towels and scarf ends, too. Pattern 6906 contains a transfer pattern of a motif 6 1/2 x 2 1/4 inches and 2 motifs 6 1/2 x 1 3/4 inches; materials needed; instructions for edging; illustrations of stitches.

To obtain this pattern send 20 cents in coins (stamp cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Stories Of Deeds Of Heroism For Which Britishers Were Awarded The George Medal

The story of Britain's heroes in multi goes on.

Latest chapter in the glorious tale of "The Infantry of the Civilian Line" was told in a recent supplement to the official London Gazette. These are examples of deeds which won the George Medal and the Civilian Division Medal of the Order of the British Empire.

Crawling through crumbling tunnels towards trapped victims of raids;

Darting between blazing gas-holders to turn off red-hot valves with blistered fingers;

Ignoring time bombs and falling high-explosive bombs to ease their comrades.

Some of those honored are "white collar" workers, some have left the workshop bench for civil defence service, some are just doing ordinary jobs on the lines, in the sheds and beside the gasometers. All have shown high courage in the battle of Britain.

Edward Nichols, superintendent of the Liverpool police, and John McEwan, a prison officer, earned the George Medal, and Frederick Bower, prison's chief officer, the Civil O.B.E. medal for rescuing prisoners when a high explosive bomb, severely damaged a wing of Walton Prison, Liverpool, containing four tiers of cells. Gas and water were escaping and the electric light failed.

Supt. Nichols saved one prisoner by constructing a platform of broken steel girders and flat stones over his head. More than three hours' work with picks, bars and sledge hammers was necessary.

The rescue was effected by the light of pocket lamps, with the danger of the roof and wall of the wing collapsing in a gas-polluted atmosphere, amid flooding from fractured water mains and with enemy aircraft overhead.

Here are other extracts from the long official story of heroism:

One tells of the thin man, whose great height enabled him to reach a trapped victim. He is Sgt. William Elgg of the Walsley police, who wriggled through an aperture 18 inches square and, with his legs suspended in mid-air, passed out broken one by one until he reached the injured man. He receives the medal of the O.B.E. Civil Division.

Sidney Goodwin, a Tottenham stretcher-bearer, burrowed through a passage under debris for 10 feet, reached a man sheltering behind a door and crawled backward with him as the tunnel collapsed.

Semi-conscious from coal gas fumes with three of his party already suffering from gas-poisoning, Henry Shimmings, superintendent of Twickenham rescue party, ordered his men to stand away, crawled through a gas-laden hole and made a determined effort to reach a trapped woman.

He was dragged from the hole unconscious. When he recovered he gave exact instructions about the woman's position. This information led to her release half an hour later. He was awarded the George Medal.

Red Propaganda

Subversive Literature Found On Eastern University Campus Charges that Communist propaganda is being distributed at Queen's University, Kingston, were made by the Queen's Journal, organ of the university alumnae society, which referred to previous reports of the finding of subversive literature on the campus of the University of Toronto. "Now it seems the same blot is spreading over Queen's," it declared.

"The question is whether or not people still possess the right to print and distribute material which is definitely detrimental to the war effort and a threat to the unity which we now need more than ever." Principal Dr. R. C. Wallace of Queen's was quoted as saying: "We do not want this sort of thing here," and the Journal advised students to report to the authorities when they find material of this sort.

Just Another Detail

Don't polish your brass, is the new order to troops in England. Brass on arms and equipment must now be left unpolished. This instruction has been issued to the troops because shining brass makes them more conspicuous from the air. They think of everything over there.

The British colonial empire has an area of 2,000,000,000 square miles, and a population of 50,000,000.

Using Moving Target

Story Explains How R.A.F. Bomb-Aimers Acquire Their Skill

Royal Air Force bomb-aimers learn their job without bombs, dropping imaginary high explosives from the eight-foot gallery of a darkened room on to a moving target flashed on the floor by a motion picture projector.

The bomb-aimer sits in a compartment giving him a clear view of the floor below. The pilot sits behind him while the instructor watches from the side.

The floor is the screen on which is thrown a film taken from an airplane showing the ground as it appears when flying at about 10,000 feet. If that is the height from which the attack is to be made.

Slowly the ground slips away and looking down from the gallery the aimers get a perfect illusion of flying.

The instructor points to a distant part of the moving landscape, to an objective to be bombed, and the aimers then begin to guide the pilot as he would in the air, bringing the plane over the target.

As he receives his instructions, the pilot shifts his controls, connected with the projector, and the ground slides a little to the right or left while the aircraft appears to be turning the opposite way.

When the aimers think he has the objective in his sight a sudden red flash in the cockpit shows he has released his bomb.

In reality he releases nothing, but during the time it takes a bomb to fall 10,000 feet the ground keeps moving. The aimers approach two concentric rings, the inner one at most an inch in diameter. It is painted on the floor. The film stops abruptly at the moment when the bomb would hit.

If the aimers have done his work accurately, the objective will be superimposed exactly on the rings. If not it may be several inches away—equivalent to several hundred yards in the actual bombing. Again, continuing until the aimers have mastered his task.

Serious And Sincere

Britain Will Welcome And Like The New U.S. Ambassador

Some of the best things that can be said about John G. Winant, whose nomination as our new Ambassador to the Court of St. James was announced, have to do with his complete unlikeness to the conventional diplomat. Though he did not have to get his education by the aid of pine-knots in a country firetrap, he looks and acts as though there were a log cabin in his ancestry somewhere. In a sense he is not a self-made man, but in another sense he is: he made a career for himself as a reforming Republican Governor in New Hampshire; put his mark on the Social Security Board during a brief incumbency; resigned that job so that he could defend the Social Security Act against criticisms from the presidential candidate of his own party; has done yeoman work as head of the International Labor Office. His friends in Britain—and there must be many of them—include those who have dared to face the social and economic problems of democratic states. He will understand thoroughly the cause for which all the people of Britain are fighting. He will make an impression of complete seriousness and sincerity. He should be quickly confirmed. In Britain there are already assurances that he will be warmly welcomed.—New York Times.

Lecture Car Popular

Thousands Of Prairie Farmers Learn About Tree Planting

The Canadian Forestry Association at its 41st annual meeting adopted a resolution urging a program of forestry improvement as a means of providing employment for soldiers and war industry workers after the war. The association's annual report showed that in the prairie provinces, the association's railway lecture car taught tree planting to 41,000 farm people at 306 meetings. The instructions included methods of establishing shelter belts.

So far as human beings as a whole are concerned, the mallard is the most important of all ducks.

Shanghai recently jumped its municipal taxes 40 per cent.

New Type Of Plane Which Does Unbelievable Things Has Passed Final Tests

Conducting Novel Tests

British Scientists Are Preparing For Vast Re-Building Plan

British scientists are working hard for the day when the sound of the builder's hammer will succeed the thud of the bomb.

At the Building Research Station, Watford, near London, they are looking ahead to peace time when Britain will multiply by many times the £200,000,000 which she used to spend on building in a year. Their work ranges over materials, for quality and suitability; over design, for light and warmth. They can tell by consulting their Electric Man whether any given room, because of the materials of walls and ceiling requires much heating or little.

This Electric Man is a cylinder with the same surface as an average human body. An electric current keeps him at body heat and a thermostat control keeps this temperature constant. He is wheeled into a room and his consumption of electricity shows how much of it is needed to keep this constant.

And they have a section of the Universe itself set up in miniature in their laboratory at Watford. An artificial sun is slotted in a vertical column and set at the appropriate altitudes of the changes of the seasons. A six-inch house model on a disc swung on pivots is orientated to season, latitude, and time of day.

So the heliodon, this ingenious instrument showing the earth moving round the sun, tells the architect how the shadows will actually fall upon his finished house and show him where he may amend his design to get all the sunshine there may be.

Junior Red Cross

Saskatchewan Section Purchases A Mobile Kitchen For British Home Office Fire Brigade

Money contributed by Junior Red Cross members throughout Saskatchewan has been used to purchase a mobile kitchen for the use of the British Home Office fire brigade division in England.

Word was received from England that 36 mobile kitchens were wanted and the Canadian society asked the Junior divisions throughout Canada to buy five of these kitchens.

Immediately the Saskatchewan division heeded this appeal and money for the purchase of one kitchen, a total of \$3,100, was noted for this purpose and sent to National Red Cross headquarters.

The mobile kitchen will bear a name plate showing that it was donated by the Saskatchewan Junior Red Cross.

Sounds Like Good Advice

People Should Stop Wasteful Means Of Raising War Funds

Mrs. C. D. Howe, wife of the Minister of Munitions and Supply, expressed the opinion that the women of Canada should discontinue tea and other "wasteful" means of raising money for war work.

"Such entertainment is unnecessary," she said, "it costs money which should not be spent. We should be satisfied to give to war work without getting something to eat on the side."

"We've got to give up extra sweets, extra foods we don't need and would be better without. The saving should go into the war effort. It's time, too, to begin turning off the electric lights that are not being used."

Transportation In Paris

Small automobiles powered by batteries which can be recharged by plugging into an electric wall socket have appeared on Paris streets. They have a top speed of about 25 miles an hour. There is great demand in Paris for transportation to replace taxis, banned owing to the gasoline shortage.

Radio-Controlled Plane

The British air force is using a radio-controlled plane, the "Queen Wasp," which has a top speed of more than 200 miles an hour and a cruising range of several hundred miles for anti-aircraft practice.

In four Canadian provinces, agriculture is the outstanding factor of net production.

Much depends on the point of view. Most lazy people just think they have a lot of patience.

An airplane which can carry a flying milkman from door to door is an accomplished fact.

He could stop this plane in the air while he deposited bottles, picked up empties.

All he would need would be a window-high shelf. In fact, he could fly to within two feet of you when you called for an extra bottle of cream, and place it in your hands.

He could back away—always flying—always the courteous milkman, even in the air. Then he could speed away at 30 to 40 miles an hour to the next house.

This can be done, because it has been done except that the flyer wasn't a milkman and instead of a bottle of cream it was a suitcase. The plane at present would not fit all yards, but it would do for most.

The plane is one of several breathtaking prospects of the apparently near future in the air, described by experts to the midwinter meeting in New York of the Institute of the Aeronautical Sciences.

The flying milkman plane is a helicopter, called the VS-300, built by I. I. Sikorsky, of the Vought-Sikorsky Company, United Aircraft Corporation. It flies straight up, stands still in air, flies backward and has done 30 to 40 miles straight-away, and performed well in a 25-mile wind.

The tests have been under way for nearly a year. Sikorsky told the institute the experiments have proved that this kind of ship would solve the problem of landing and taking off between buildings, between trees, on buildings and on ships.

"There can be no doubt," he said, "that it opens a most important and large new field of transportation."

It has no wings. Its ribs are all bare, forming a cage-like structure, with the pilot sitting out front, in the open air. The main difference to the conventional propeller.

This is a set of large, windmill-like blades, set up on a post to spin in a horizontal plane above the ship, to lift it straight up. At the end of its long tail are three small copies of the same propeller, set both to steer and tilt the plane. Tilling prevents the gross, over-sized propeller from falling forward, carrying the ship along in level flight.

Another plane, resembling a flying insect, is almost as amazing, although it is only in the design stage.

It is completely unorthodox, designed to fly straight up at nearly a mile a minute, and then to turn over on its side and do 500 miles an hour straightaway.

The designer, Lloyd H. Leonard, is with the Bureau of Aeronautics, United States Navy Department, Washington.

The main new thing is the position of its propeller blades. They are of the windmill type, and they rotate around the body of the ship.

The wings are quite small; in fact, Leonard said the ship would be built to fly well without any wings.

There are two sets of propellers, fixed in about the same positions as the wings of a double-winged insect. They revolve in opposite directions.

To take off or land, this design will stand on its tail, on four long, retractable shock-absorbing legs. The propellers, or rotors, keep it steady when standing on the ground.

After rising straight up to flying altitude, it is designed to turn over by 90 degrees, when it becomes to all appearances exactly the same type of place as to-day's commercial and military ships.

Pilots and passengers are to have pivot seats, so they can sit on an even keel while the ship turns about them.

The Pride of Britain

Britain's pride, the Queen Elizabeth, largest ship afloat, regularly tops by 6,000 the peak load established by the Leviathan in carrying doughboys across from U.S. in the first world war. The Elizabeth's ordinary passenger list is 16,000 troops from Australia to Egypt—and thousands of Italian prisoners have been taken back.

Could Be Spared

We have more and better cows now than when Canada was exporting in excess of 200 million pounds of cheese annually to Britain. Surely, says the Farmer's Advocate, we can spare the 112 million pounds this year even if we have to do with a little less ice cream and candy.

There is little or no difference in the coolness of white and dark clothing of the same weight at night.

An Invitation To Every Woman

Come to the Wabasso Demonstration

April 2nd to April 5th

The lecturer, Mrs. Ballingal, comes to us highly recommended, both as a speaker and as a most capable exponent of all home making arts.

Lovely Prizes
are given away at each session

During the week of demonstration a Wabasso Bunny Bank FREE with every purchase of Wabasso material of \$1.98 or over.

HEDLEY'S HALL

IRMA

ALBERTA

LOCALS

Miss Rena Fenton is visiting relatives and friends in Edmonton this week.

Born to Mr. and Mrs. R. Reber, at the Wainwright hospital on March 21st, a son.

The R.C.M.P. have issued a warning to truck owners that the highway is banned until further notice.

Mr. and Mrs. John McMillan and two sons George and Roy, of Entwistle, Alta., visited at the home of Mr. and Mrs. C. L. Feroe this week.

Although the highway between Kinross and Edmonton is in fair condition, busses and trucks have been banned since Monday.

The snow melted very fast the first few days of this week. Our first rain of the season arrived Tuesday afternoon, March 26th.

It was reported recently that Messrs. Harry Batchelor of Felsburg and Calvin Urquhart, formerly of Irma, are both working at Fort William, Ont.

Miss Mary Elliott, a former district old timer, passed away at Seattle, Wash., on March 12th. We expect to have a complete account for next week's paper.

Mr. M. McMillan and family had a visit last week from his nephew E. McNaughton who is in training with the R.C.A.F. at Victoria.

The Irma L.O.B.A. is being represented at the Grand Lodge meeting in Edmonton by Mrs. E. W. Carter, who is a Grand Lodge officer. Mrs. C. E. Fenton, the official Irma delegate, and Mrs. Roland Herbert.

The next meeting of the Irma Young People's Group will be held on Thursday, April 3rd. This will be an open meeting. All parents, older folks, or anyone interested in Young People's work, are cordially invited to attend. The meeting begins at 8:15 p.m.

The prize winners at the last L.O.B.A. whist drive were ladies 1st Mrs. David Jones; 2nd Mrs. R. H. Ott; gentlemen 1st Mr. H. Cooper; 2nd Mr. O. A. Lovig. The grand prize for the season will be given at the next whist drive, the last one of the season. The draw for the cushion will also take place.

Mrs. L. Hager was in Calgary on March 6th to see her son, Roy, off to Toronto. Roy joined the R.C.A.F. as mechanic. Since arriving in Toronto he contracted scarlet fever and is now in quarantine.

Mrs. Ballingal of Montreal, the demonstrator for Wabasso and an expert on household economics, will demonstrate in Hedley's hall, April 2nd to 5th, inclusive, under the auspices of the W.I. This is a demonstration that every woman in the district will do well to see. A chance in a lifetime. Make your plans to attend.

On Tuesday evening, March 18th, Albert Larson, who has been called up for four months military training, was pleasantly surprised by a gathering of his friends and neighbors at the home of his parents, Mr. and Mrs. Alf Larson. The evening was spent in card playing and games, after which a delightful lunch was served and Albert was presented with a wrist watch as a token of friendship from those present.

A regular monthly meeting of the Glenholm Social Credit study group will be held in the school house on Wednesday evening, April 2nd, at 8 p.m. All members are requested to attend if at all possible.

PLASNIK—MARK

A lovely wedding was solemnized in Edmonton when Louise Mark, only daughter of Mr. and Mrs. Tom Ambler of Irma, became the bride of Nick Plasnik, now serving with the Edmonton Fusiliers.

The bride was dressed in white silk with silk net over dress, her veil was held in place with orange blossoms, and she carried a bouquet of pink roses. The groom wore the uniform of the Edmonton Fusiliers.

Monthly Meeting Wainwright S.D.

The regular monthly meeting of the board of trustees of the Wainwright school division No. 32 held at the office of the secretary-treasurer, Wainwright, March 26th, 21st, 1941. Trustees present were: Chairman Henry E. Spencer; vice chairman T. Sanders; trustees J. C. McLean, F. E. Dixon and M. J. Nicholson.

Meeting called to order at 4:30 p.m. Minutes of last meeting read. Moved by Nicholson—That minutes be adopted as read.

Moved by Spencer—That report of trustee Sanders re plans for addition to Irma high school be accepted. Cd.

Moved by Dixon—That request of Mascot S.D. to purchase a piano and gas stove for their school, the same to be charged to their trust account, be accepted. Cd.

Moved by McLean—That correspondence from local board, Batts S.D. re new chairs and desks for their school be tabled until April meeting. Cd.

Moved by McLean—That letter from local board, Orindas S.D. be received and left with trustee for subdivision 1. Cd.

Moved by Dixon—That we grant the request of local board, G.S.D. shields to scrub and oil school floor when necessary. Cd.

Moved by McLean—That we advise local board Rodino S.D. that their recommendation re coal will receive consideration. Cd.

Moved by Dixon—That we write local board Paxton S.D. that we are willing to purchase a cook stove for their school providing they are willing to charge same to their school trust account. Cd.

Moved by McLean—That we advise local board, Passchendale S.D. that the matter of a cupboard built at their school will be considered when mid-summer repairs are being done. Cd.

Moved by Nicholson—That we adjourn till 7:30 p.m. (time 6 p.m.) Cd.

Meeting called to order at 7:30 p.m. Moved by Dixon—That we approve of action of office re water payments at Trafalgar school. Cd.

Moved by Nicholson—That tender of R. Moncrief to supply wood to La Pearl school be accepted. Cd.

Moved by Nicholson—That the tender of Jim Chiswell to supply wood to Cream Meadow school be accepted. Cd.

Moved by Sanders—That we grant request of Mr. O. P. Larson, Irma H.S., to rent Hedley's hall for two additional periods for P.T. April 1 and 8 respectively. Cd.

Moved by Spencer—That the secretary write to all schools that have advised that they wish to withdraw from the division. That the divisional board has not the authority to act in this regard but that if any of the ratepayers wish to call at the divisional office we will be glad to give them all the information that we have with respect to costs as between divisional operation and under the individual schools. Cd.

Moved by Spencer—That the council of Gilt Edge M.D. be written to giving them a copy of statement drawn up with regard to school costs before and after division took over, and that they be requested to give this statement the same publicity by publishing same in the Wainwright Star as was given to their statement made at the annual ratepayers meeting of their municipality. Cd.

Moved by Sanders—That report of the high school inspector re Irma high school be placed on file for future reference.

Moved by Nicholson—That secretary publish minutes of board meeting in local newspapers. Cd.

Moved by Sanders—That meeting adjourn till 9:00 a.m. tomorrow, (time 9:30 p.m.) Cd.

Meeting called to order at 9 a.m. Friday, March 22.

Moved by Sanders—That accounts statement No. 3 in the amount of \$1,493.15 be approved and statement incorporated in the minutes. Cd.

Moved by Spencer—That the office be authorized to call for tenders for school supplies for 1940-41. Cd.

Moved by Nicholson—That the superintendent's monthly report be accepted. Cd.

Moved by Sanders—That we write the Irma S.D. board asking if they are willing to reconsider their entry into the division, with the proposals as put forward by Mr. Sanders as a basis providing they are willing to reconsider that we appoint a committee to meet the Irma board. Cd.

Moved by Sanders—That the Wainwright Red Cross be loaned the projector until otherwise required on the understanding that it be returned in good condition, and that this apply to any other applicant for its use for Red Cross work. Cd.

Moved by Spencer—That a committee consisting of trustees Sanders and McLean be appointed to meet with the Irma school board. Cd.

Moved by Spencer—That the next regular board meeting be held on April 17th, commencing at 9 a.m. if roads are open and at 4:30 p.m. if roads are closed. Cd.

Moved by Sanders—That this meeting be now adjourned (time 11:30 p.m.) Cd.

Save left-over griddle batter and use it for dipping chops, cutlets and so on.

Candied cranberries are just as effective as candied cherries for garnishing winter foods.

VALVES are the heart of your Engine

Upon the valves depends the sealing of the combustion chamber. If they do not seal tightly and at the proper time, your engine will be hard to start and will perform poorly. It will waste gasoline and oil. Don't let anyone tell you that valves never need grinding or adjusting. Valve service is an investment in economy and satisfaction.

FARMERS BEWARE!

Examine All Stored Grains Regularly for
GRAIN MITES

Toughness and Heating in first 3 feet of grain are signs of mite activity.

Act promptly if mites are present

Provide good ventilation for all bins. Your engine will be hard to start and will perform poorly. It will waste gasoline and oil. Don't let anyone tell you that valves never need grinding or adjusting. Valve service is an investment in economy and satisfaction.

Transfer grain from one bin to another.

Clean grain and turn screenings.

Examine regularly for further infestation.

If mites are present they will be found in the screenings obtained from sifting samples of grain. Use a magnifying glass to examine dust at bin temperatures.

Further information may be obtained from the District Agriculturalist, Local Elevator Agent, Dominion Entomological Branch, Lethbridge, or the Field Crops Branch, Edmonton.

NOTICE OF PREPARATION OF ASSESSMENT POLL 1941

MUNICIPAL DISTRICT OF BATTLE RIVER, No. 423

Notice is hereby given that the assessment roll of the said Municipal District, made under the provisions of the Assessment Act, has been prepared and will for thirty days be open to inspection at the office of the Secretary-Treasurer of the Municipal District from ten o'clock in the forenoon until four o'clock in the afternoon on every day not a public holiday except Saturday, and on that day from ten o'clock in the forenoon until two o'clock in the afternoon, and that any person who desires to object to the entry of his name or that of any other person upon the said roll, or to the assessment of any property, or to the assessed value placed upon any property must within thirty days from the date of this notice lodge his complaint in writing with the Secretary-Treasurer of the Municipal District.

Dated this 26th day of March, 1941.

CHAS. WILBRAHAM,

Secretary-Treasurer

MUNICIPAL DISTRICT OF BATTLE RIVER, No. 423 PUBLIC NOTICE

Under the provisions of Section 26 of the Tax Recovery Act, 1936, the following parcels of land may be leased from the Municipal District of Battle River No. 423 for a term of one or three years as the case may be.

Applications, written or oral, will be considered at the April 10 meeting of the council of the said District at 2 o'clock in the afternoon.

Redemption may be effected by payment of all arrears of taxes and costs at any time prior to time of lease.
